Requires significant time, money, and personal investment

- ? Training issues for admins and end users
- ? Operating system, client access license, and add on services costs
- ? Significant change in code base, many new features, greater chance of errors
- ? Slow adoption, smaller knowledge base
- ? Requires infrastructure changes, DNS

This image shows a blank sheet of white paper with horizontal ruling lines. The lines are evenly spaced and extend across the width of the page. On the right side, there is a thick black border that is slightly irregular, suggesting it might be a scan of a page from a notebook or a document. The paper is otherwise empty of any text or markings.
